

Adrian Denvir, PhD

Director of SBIR Programming

UNT Health Science Center

Dr. Adrian Denvir is a technologist and entrepreneur with over 30 years of experience generating revenue from new scientific discovery, business development, client services, and commercial contracting.

He began his career at Lynntech Inc. in College Station where he led a research team that generated over \$30 million in SBIR/STTR Phase I and Phase II technology-focused project funding.

In 2006, Dr. Denvir co-founded the Lynntech Technology Transfer Division, which utilized federal funds to develop and commercialize cutting-edge technologies that reside in DFW area universities. In 2011, he was named director of new science and technology at NCH Corporation where he was responsible for the development, testing, and commercialization of new-to-market water treatment products. In 2022, Dr. Denvir became the director of HSC Next SBIR Phase 0 Program, a Tarrant County-funded program that assists small businesses in pursuing SBIR/STTR funding.
