

Jason Mastoris

Co-Founder

Panthera Biosolutions

Jason Mastoris currently serves as a founding partner of Panthera BioSolutions, LLC, a Fort Worth based start-up company that will be offering specialized manufacturing / lab services, Ready-to-Use (RTU) GMP spaces and hands-on training to pharmaceutical / biotech companies, career changers and students. He has 20 years of experience in clinical research, project/program management, eClinical technology (IRT, EDC, CTMS), supply chain management and aseptic manufacturing operations.

Jason started his career in clinical research, working on retrospective clinical studies and co-authoring publications in the areas of oncology, hematology and bloodless medicine. His work has been published in several peer-reviewed journals, including the Journal of Clinical Oncology, Blood, Community Oncology and Transfusion.

After several years of Management Consulting in Accenture's Life Science Pharma R&D practice, Jason relocated to Texas in 2012 to work for Alcon, where he served as a Technical Leader and Head of Clinical Supplies Management.

Prior to co-founding Panthera BioSolutions, Jason held several key leadership positions at Novartis including Director of Clinical Operations for the Novartis Aseptic Pilot Facility and Head of Drug Supply Management, Ophthalmology.

Jason obtained his A.B. in Economics from Princeton University.
