

## Thomas Page, PhD

Senior Vice President of Operational  
and Technology Alignment

**FujiFilm Diosynth Biotechnologies**

Dr. Page is currently Senior Vice President of Operational and Technology Alignment for the global small scale business unit at FUJIFILM Diosynth Biotechnologies. He has over 30 years of experience in Pharmaceutical Development, Manufacturing, Operations and Engineering in equity financed biotech, governmental partnerships and CDMO settings.

His experience includes successfully devising and implementing the Engineering and Production strategy to support regulatory approvals in the U.S., EU, and other foreign jurisdictions for several large volume parenterals. He led design, construction, start up and operation for >15 substantial assets globally for blood products, antibodies, vaccines, viral vectors and plasmids. He is actively engaged with industry to push forward innovation in service to patient access and patient safety.

Currently, he is leading a global standardization effort for all single use platforms for FDB (drug substance and drug product.)
